Introduction

What the 7Ps Dashboard is for

The **BMH 7Ps Dashboard** is Ben Mussa Holding's business-intelligence website. It turns sales, pipeline, marketing and product data from the company's systems into clear, up-to-date reports you can open in a web browser, with nothing to install.

The dashboard is organised around the **7Ps** of the marketing mix. Each "P" is a department:

Department ("P")	Business area	Status at launch
Promotion	Commercial Department (sales performance)	Live
Price	Finance Department	Coming Soon
Place	Supply Chain Department	Coming Soon
People	Human Resource Department	Coming Soon
Process	Excellence Department	Coming Soon
Physical Evidence	HSE Department	Coming Soon

As a salesperson, you use the **Tachometer** report in the Promotion department. It shows how your own sales compare with your targets, year-to-date and month-to-date.

Who this manual is for

This manual is for **salespersons**. Your account can open one report, the **Tachometer**, and it always shows **your own sales only**. This manual covers everything you need: signing in, reading the Tachometer, changing the dates, opening the detailed breakdown, exporting and printing, and signing out.

You don't need any technical knowledge to use the dashboard or this manual.

How to use this manual

- Button names, menu items, field names and messages are written in **bold**, exactly as they appear on screen. For example: click **Sign in**.
- Step-by-step procedures are numbered. Follow the steps in order.
- Numbered red circles on a screenshot match the numbered list under it.
- Screenshots use sample data: names and figures have been replaced, so the numbers you see on your screen will differ.

Three kinds of boxes highlight important information:

NOTE

Extra information that helps you understand how something works.

TIP

A shortcut or a better way to do something.

WARNING

Something that could cause a problem or an unexpected result if you ignore it.

Getting started

What you need

Item	Requirement
Web browser	A current version of **Google Chrome** or **Microsoft Edge** (recommended), **Mozilla Firefox** or **Safari**. Keep your browser up to date.
Screen	A laptop or desktop screen (1280 pixels wide or more) gives the best view. The dashboard also works on tablets and phones, with the menus rearranged to fit.
Network	Internet access to `https://dashboards.benmussaholding.com/Dashboard`
Account	A user account created by the system administrator. There is no self-registration.
PDF reader	Any PDF viewer (for example your browser or Adobe Acrobat Reader) to open exported reports.

Opening the dashboard

1. Open your web browser.
2. Go to **https://dashboards.benmussaholding.com/Dashboard**
3. If you are not signed in, the **Sign in** page opens.

> **TIP**
> Add the address to your browser's bookmarks or favourites so you can open it in one click.

> **TIP**
> You can also install the dashboard as an app on your computer or phone, so it opens from its own icon. For a short video showing how to do this, contact support (see Support contact).

Signing in

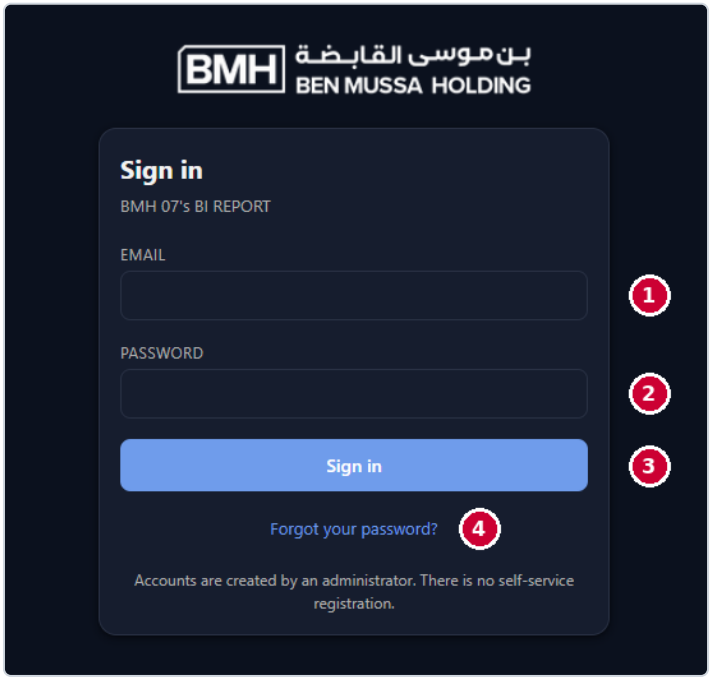

Figure 1. The Sign in page

1. **Email**: type the email address of your dashboard account.
2. **Password**: type your password. The characters are hidden as you type.
3. Click **Sign in**. The button shows **Signing in…** while your details are checked.
4. **Forgot your password?**: see Forgotten password below.

When you have signed in, the dashboard opens with the reports you are allowed to use. Your account can use the **Tachometer** only.

Sign-in messages

Message	What it means	What to do
Invalid email or password.	The email or the password is wrong.	Check the spelling, the **Caps Lock** key and the keyboard language, then try again.
Your account is locked. Contact your administrator.	Your account has been locked, for example after 5 wrong passwords in a row, or by an administrator.	Contact the administrator (see Support). Only the administrator can unlock it.
Your account is inactive. Contact your administrator.	Your account has been switched off.	Contact the administrator.
Too many attempts. Please try again later.	Too many sign-in attempts were made from your connection in a short time (more than 10 in 15 minutes).	Wait 15 minutes, then try again.

Message	What it means	What to do
Something went wrong. Please try again.	A temporary network or server problem.	Check your internet connection and try again. If it continues, contact support.

WARNING

After **5 wrong passwords in a row**, your account is locked automatically. If you are not sure of your password, stop and contact the administrator before you are locked out.

First-time sign-in: setting your own password

New accounts are created with a temporary password. The first time you sign in, the dashboard asks you to replace it before you can open any report.

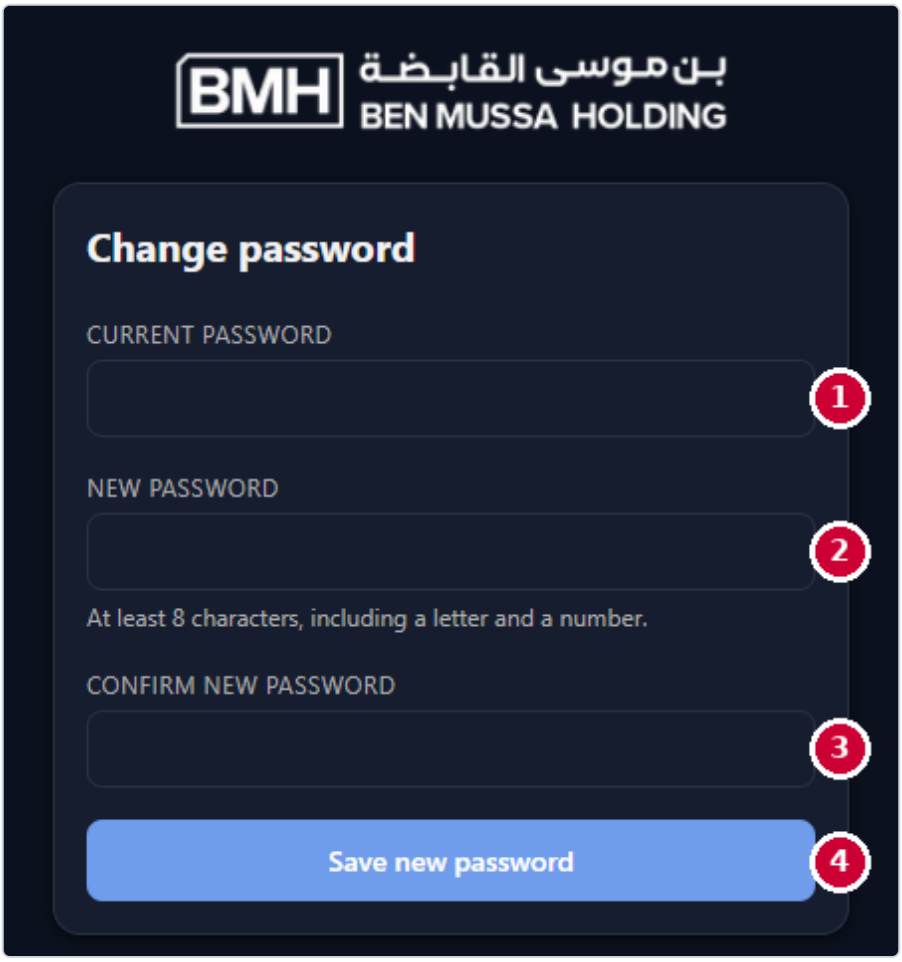

Figure 2. The password form. On first sign-in it is titled Set a new password and also shows Sign out instead.

1. **Current password**: type the temporary password you were given.
2. **New password**: type a new password. It must be **at least 8 characters long** and contain **at least one letter and one number**.
3. **Confirm new password**: type the new password again, exactly the same.
4. Click **Save new password**. The dashboard opens.

On first sign-in, the form is titled **Set a new password** and has a **Sign out instead** link under the button. That link leaves without changing the password, and you'll be asked again next time.

Message	What to do
New password and confirmation do not match.	Type the same new password in both boxes.
Password must be at least 8 characters long.	Use a longer password.
Password must contain at least one letter and one number.	Add a letter or a number.
Current password is incorrect.	Re-type the temporary password exactly as you received it.

> **TIP**
> Choose a password you have not used elsewhere, and do not share it. Your data access is personal to your account.

Forgotten password

Password resets need **administrator confirmation**.

1. Contact the system administrator (see Support contact) and ask for a password reset for your account email.
2. When the administrator has confirmed the reset, you'll receive a temporary password or a reset link.
3. Sign in with it. The dashboard then asks you to set a new password, as described in First-time sign-in.

> **NOTE**
> The Sign in page also has a **Forgot your password?** link. Don't use it: always contact the administrator to reset your password.

Changing your password

To change your password, follow the same process as for a forgotten password:

1. Contact the system administrator (see Support contact) and ask for a password change for your account email.
2. When the administrator has confirmed the change, you'll receive a temporary password or a reset link.
3. Sign in with it. The dashboard then asks you to set a new password, as described in First-time sign-in.

> **NOTE**
> Changing your password signs you out on your other devices and browsers. Sign in there again with the new password.

Signing out

1. Click the **Log out** icon (an arrow leaving a door) at the far right of the header.
2. The **Sign in** page opens. Your session on this browser is ended.

> **WARNING**
>
> Always sign out on a shared or public computer. If you only close the browser tab, you stay signed in on that computer.

Session timeout (how long you stay signed in)

> **NOTE**
>
> **The dashboard has no automatic time-out for inactivity.** After you sign in, you stay signed in on that browser, even if you close it and come back days later, until one of these happens:
>
> - you click **Log out**;
> - your password is changed (you are signed out everywhere else);
> - the administrator resets your password, locks your account or ends your sessions;
> - 365 days have passed since you signed in.
>
> If your session ends while you are working, the page shows **Your session has expired.** or returns to **Sign in**. Just sign in again. Your filters go back to their defaults.

Interface overview

The 7Ps Dashboard Hub (home page)

The hub is the first page after you sign in. Click **Home** in the sidebar to return to it at any time.

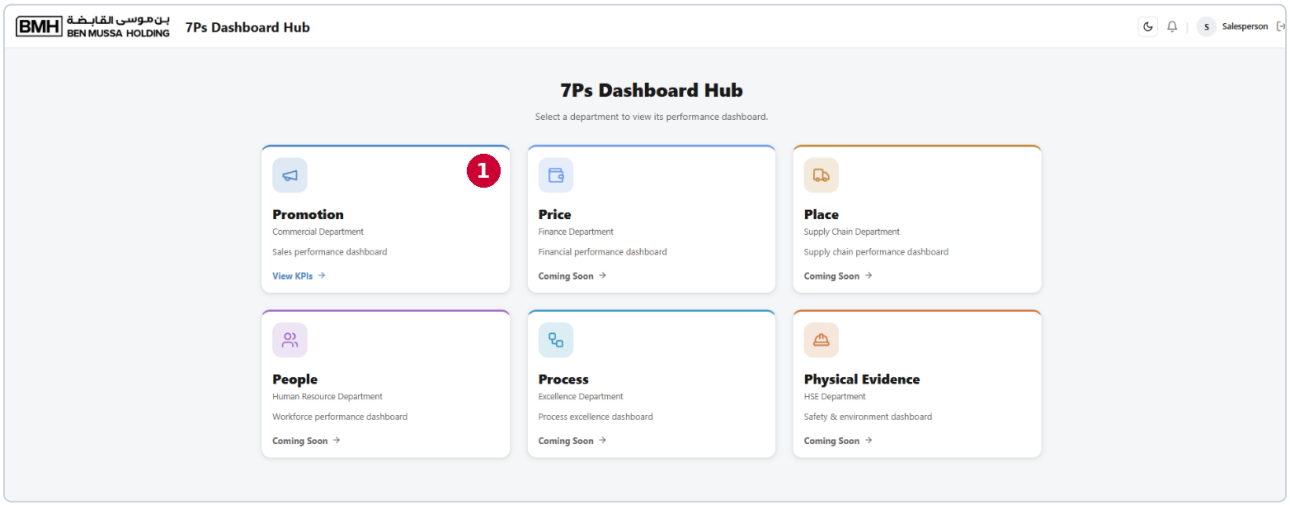

Figure 3. The 7Ps Dashboard Hub as a salesperson sees it

1. **Promotion** card: click **View KPIs** to open the Promotion department, then open **Tachometer**.

Departments marked **Coming Soon** are not available yet. Departments you have no access to are not shown at all.

Page layout

Every report page has the same layout:

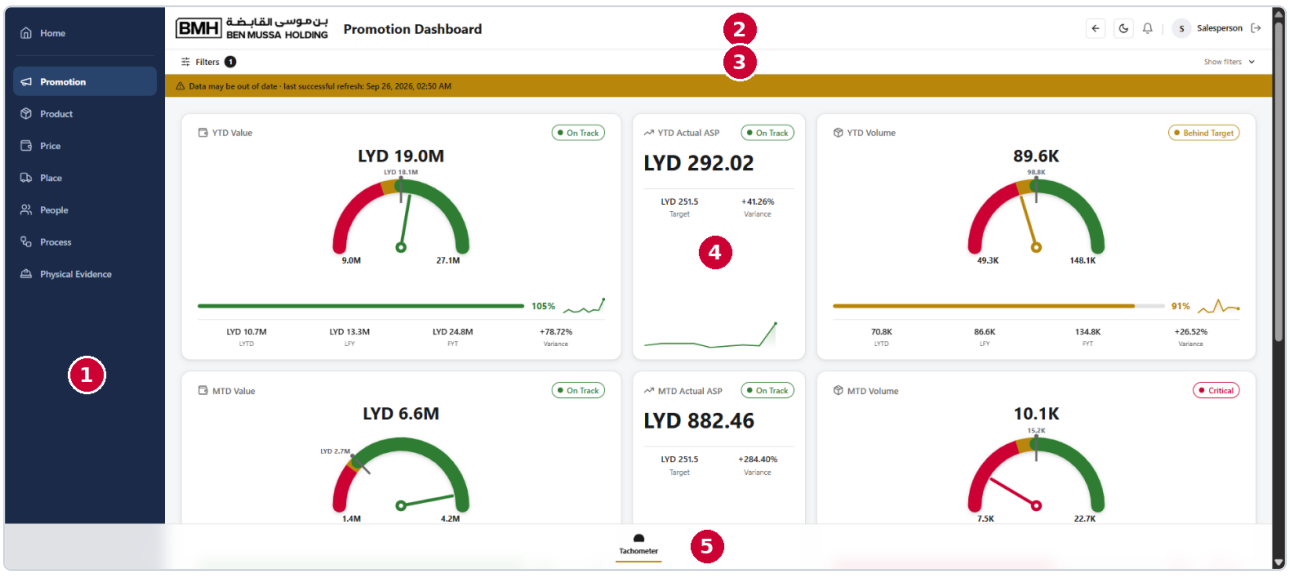

Figure 4. Layout of the Tachometer page

1. **Sidebar**: moves between departments.
2. **Header**: page title and your account controls.
3. **Filter bar**: chooses the dates and the part of the business the report shows.
4. **Report area**: KPI cards, charts and tables.
5. **Bottom tab bar**: moves between the reports of the current department.

The sidebar

The dark sidebar on the left lists **Home** and the department names. Your reports are under **Promotion**. The current department is highlighted.

- Click a department to open its list of reports.
- Click the **«** button at the bottom (**Collapse sidebar**) to shrink the sidebar to icons and give the report more room. Click it again to expand it.

> **NOTE**
>
> On a tablet the sidebar shows icons only. On a phone it opens as a menu.

The header

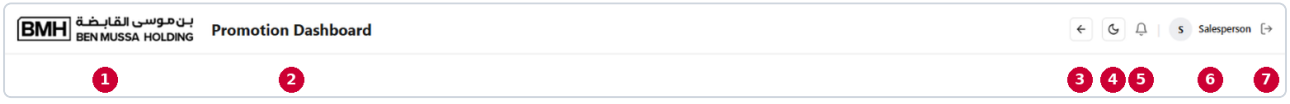

Figure 5. The header controls

#	Control	What it does
1	**BMH logo**	Shows the company. When you filter a single company, the logo of that business unit may be shown.

#	Control	What it does
2	**Page title**	The name of the page you are on, for example **Promotion Dashboard** on the Tachometer.
3	**Back** (arrow)	Returns to the page you were on before, like the browser's back button.
4	**Theme** (sun / moon)	Switches between **light mode** and **dark mode**. The dashboard opens in dark mode. Your choice applies until you reload the page.
5	**Notifications** (bell)	Reserved for notifications. **This feature will be available in a future release**, so clicking the bell does nothing for now.
6	**Profile chip**	Your initial and name. Point at it to see your role ("Signed in as: ...").
7	**Log out**	Signs you out (see Signing out).

> **TIP**
> Light mode is easier to read in bright rooms and uses less ink if you print the screen.

The bottom tab bar

The bar along the bottom of every report shows one tab per report in the current department. The current report is underlined. Click a tab to open that report. If there are more tabs than fit on the screen, scroll the bar sideways.

As a salesperson, you see only the **Tachometer** tab.

The filter bar

Filters decide **which period** and **which part of the business** a report shows. The filter bar sits under the header and is **collapsed** when a page opens.

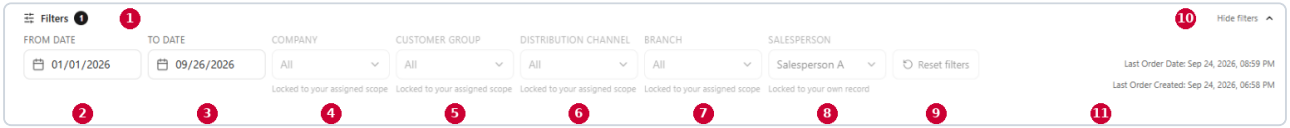

Figure 6. Your filter bar, opened. The locked fields are greyed out.

#	Control	What it does
1	**Filters** and badge	The number in the circle is how many filters are currently narrowing the data.
2	**From Date**	First day of the period. Defaults to 1 January of the current year.
3	**To Date**	Last day of the period. Defaults to today. It cannot be later than today.
4	**Company**	Majaal, Tika, or both (**All**).
5	**Customer Group**	Customer segments such as B2B and B2C. Defaults to **2 selected** (B2B and B2C).
6	**Distribution Channel**	The sales channel.

#	Control	What it does
7	**Branch**	The selling branch.
8	**Salesperson**	One or more salespersons.
9	**Reset filters**	Puts every filter back to its default. It is greyed out when nothing has been changed.
10	**Show filters / Hide filters**	Opens or closes the filter bar.
11	**Last Order Date / Last Order Created**	Shows how fresh the data is: the date of the latest order included in the report.

Using the filters

1. Click **Show filters** at the right end of the filter bar.
2. To change a date, click **From Date** or **To Date** and pick a day in the calendar.
3. To filter a list, click it (for example **Branch**) and tick one or more values. The field then shows the value, or "n selected".
4. The report updates automatically. You don't need to press a button.
5. Click **Hide filters** to give the report more room. The badge still shows how many filters are active.

> **NOTE**
>
> **Your filters are locked to your own data. Company**, **Customer Group**, **Distribution Channel** and **Branch** are greyed out with the message **Locked to your assigned scope**. **Salesperson** shows **Locked to your own record**. You can change the **From Date** and **To Date** only. Everything on the page, including exports, shows your own sales only.

Colours and status badges

The dashboard uses the same three colours everywhere to compare an actual figure with its target:

Colour	Badge text	Meaning
Green	**On Track** / **On target** / **On Pace**	The target has been reached or exceeded.
Amber	**Behind Target** / **Watch** / **Behind Pace**	Below target, by **10% or less**.
Red	**Critical** / **Off target** / **Underperforming**	Below target by **more than 10%**.
Grey	**No Target** / **n/a**	No target has been set, or there isn't enough data to compare.

Every chart has a **legend** under it that shows which line or bar is which (for example **Actual**, **Y-1** for last year, and **Target**).

Tables

Report tables share the same controls:

- **Sort**: click a column heading to sort by that column. Click it again to reverse the order.
- **Rows per page**: choose **10 / page**, **25 / page**, **50 / page** or **100 / page**.
- **Prev** / **Next**: move between pages. "Page 1 of 5" shows where you are.
- **View as table / View as chart** (on charts): shows the figures behind a chart as a table, then switches back.

How often the data is refreshed

The dashboard doesn't show live, second-by-second data. It is refreshed automatically from the company's systems on a fixed schedule (Libya time, Africa/Tripoli):

Refresh	When	What it does
Incremental refresh	Every day at **08:50, 11:50, 14:50, 17:50 and 20:50**	Adds the latest orders, invoices and pipeline activity. Takes a few minutes.
Full refresh	Every night at **02:00**	Rebuilds all sales and product data from scratch.

So the figures you see are normally at most about three hours old during the working day. To check how fresh a report is, look at **Last Order Date** and **Last Order Created** in the filter bar, or at the line at the very bottom of the page: **Last Update** (latest data included), **Last Order Created** and **Last Refresh Time** (when the last refresh ran).

> **WARNING**
>
> If a yellow bar reading **Data may be out of date - last successful refresh: …** appears under the filter bar, the most recent scheduled refresh did not complete. The figures are correct as of the time shown, but newer sales are missing. If the bar stays for more than a few hours, contact support.

> **TIP**
>
> If a sale you expect is missing, check the time of the last refresh. A sale entered at 10:00 appears after the 11:50 refresh. Reload the page (**F5**) after a refresh to see the new figures.

> **NOTE**
>
> The dashboard interface is in **English only**. There is no language switch.

Tachometer

Purpose

The **Tachometer** shows at a glance whether sales are on target, year-to-date (YTD) and month-to-date (MTD). Each figure appears as a speedometer-style gauge with green, amber and red zones. Everything on your Tachometer is calculated from **your own sales and your own targets**.

To open it: in the sidebar click **Promotion**, then click the **Tachometer** card, or the **Tachometer** tab in the bottom bar. The page title in the header is **Promotion Dashboard**.

What's on the page

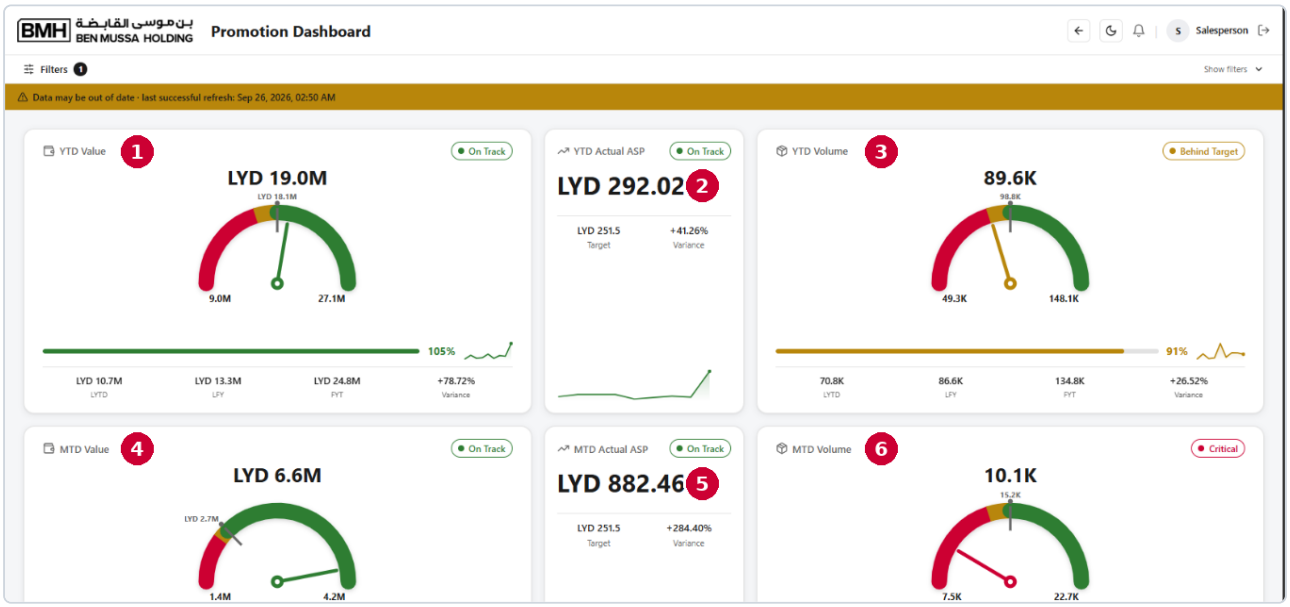

Figure 7. Your Tachometer page

The top of the page has six cards:

#	Card	What it shows
1	**YTD Value**	Sales value (LYD) from 1 January to the **To Date**, against the target for the same period.
2	**YTD Actual ASP**	Average Selling Price year-to-date (sales value ÷ volume), against the ASP target.
3	**YTD Volume**	Quantity sold year-to-date, against the volume target.
4	**MTD Value**	Sales value from the 1st of the month to the **To Date**.
5	**MTD Actual ASP**	Average Selling Price month-to-date.
6	**MTD Volume**	Quantity sold month-to-date.

Reading a gauge card

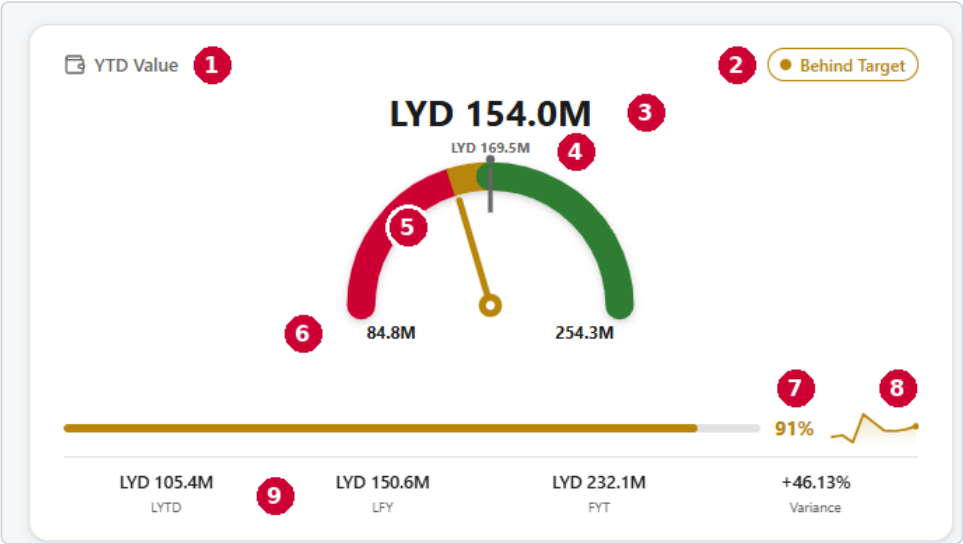

Figure 8. Parts of a gauge card

1. **Card name**, for example **YTD Value**.
2. **Status badge**: **On Track** (green), **Behind Target** (amber) or **Critical** (red). See Colours and status badges.
3. **Actual**: the big number, for example LYD 154.0M. (**K** = thousand, **M** = million.)
4. **Target-to-date**: the small figure at the top of the gauge. This is the target for the period so far, not the full-year target.
5. **Needle**: points at the actual figure. The coloured arc is red below 90% of target, amber from 90% to 100%, and green above 100%.
6. **Scale ends**: the left end is half the target (50%) and the right end is one and a half times the target (150%).
7. **Progress bar and %**: actual as a percentage of target-to-date. 100% means the target is reached.
8. **Trend line**: a small chart of the month-by-month pattern.
9. **Comparison row**:
   - **YTD cards**: **LYTD** (last year, same period), **LFY** (last full year's actual), **FYT** (full-year target) and **Variance** (change compared with LYTD).
   - **MTD cards**: **LMTD** (the same month last year, up to the same day), **LFM** (the previous full calendar month's actual), **FMT** (full-month target for the current month) and **Variance** (change compared with LMTD).

Reading an ASP card

The **YTD Actual ASP** and **MTD Actual ASP** cards show the average selling price in LYD, the **Target** ASP, the **Variance** compared with the same period last year, and a small trend chart. The status badge compares the actual ASP with the target.

Performance Details tables

Scroll down to see two **Performance Details** tables, one for value and one for volume and ASP.

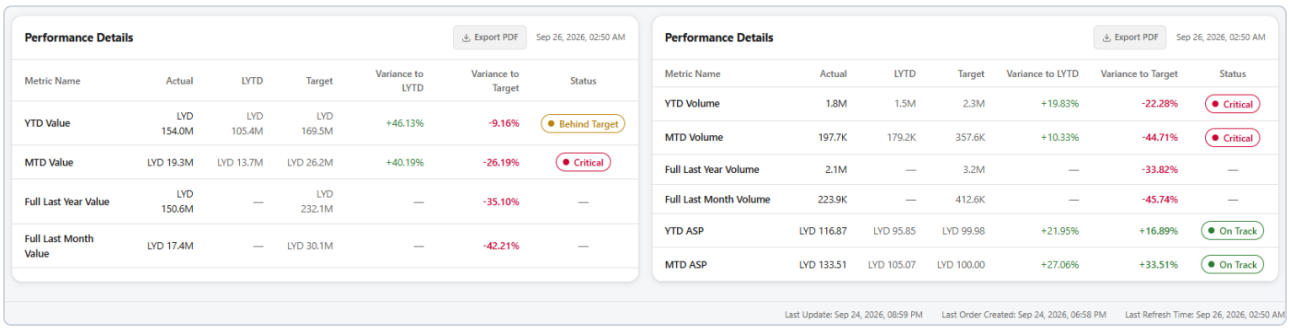

Figure 9. Performance Details

Column	Meaning
Metric Name	For example YTD Value, MTD Volume, Full Last Year Value.
Actual	The figure for the selected period.
LYTD	The same period last year (for MTD rows, the same month last year).
Target	The target for the same period.
Variance to LYTD	% change compared with last year's same period. Positive means growth.
Variance to Target	% above (+) or below (−) target.
Status	The status badge.

The date and time under **Performance Details** show when the table was produced. Click **Export PDF** next to a table to download it (see Reports and exporting).

Changing the period

1. Click **Show filters**.
2. Change **To Date** to the day you want to measure up to. For example, choose 30 June to see the position at the end of June.
3. The YTD cards then show 1 January to 30 June, and the MTD cards show 1 June to 30 June.

> **NOTE**
>
> The YTD and MTD windows are always worked out from the **To Date**. YTD starts on 1 January of that date's year, and MTD starts on the 1st of that date's month.

Opening a breakdown

Each **Value** and **Volume** gauge card can be opened to see who is contributing to the figure.

1. Click anywhere on the **YTD Value**, **YTD Volume**, **MTD Value** or **MTD Volume** card.
2. The breakdown page opens, for example **YTD Value — Breakdown**, keeping your current filters.

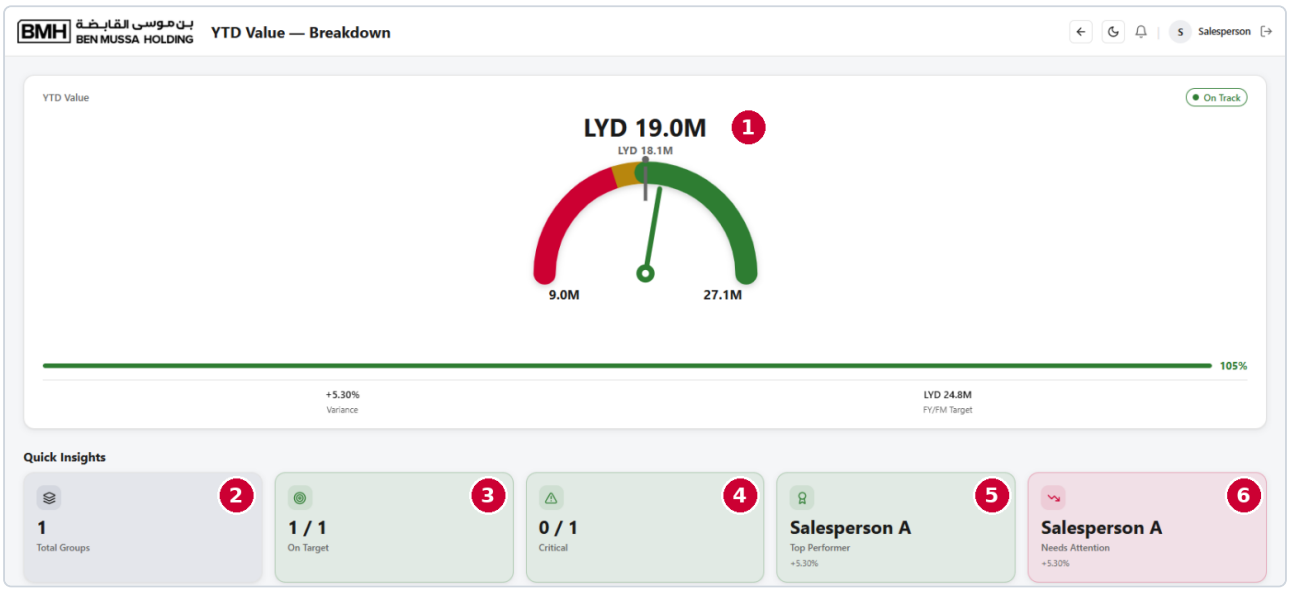

Figure 10. Your breakdown page

1. **Summary gauge**: the same figure as on the Tachometer, with **Variance** to target and the **FY/FM Target** (full-year or full-month target).
2. **Total Groups**: how many salespersons are included.
3. **On Target**: how many of them have reached their target.
4. **Critical**: how many are more than 10% below target.
5. **Top Performer**: the salesperson furthest above target, with their variance.
6. **Needs Attention**: the salesperson furthest below target.

The Full Breakdown table

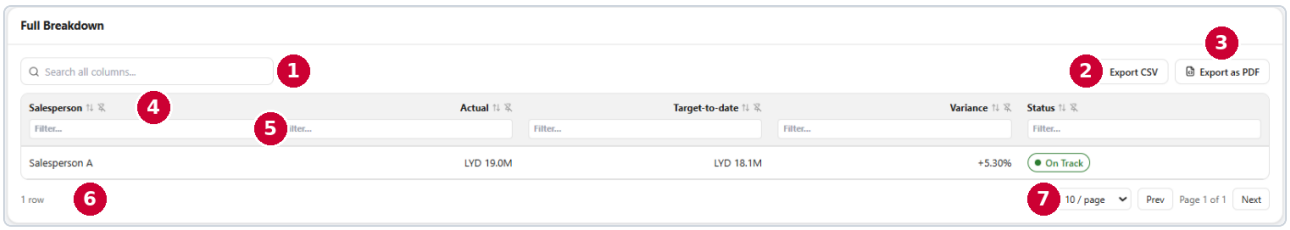

Figure 11. Your Full Breakdown table

1. **Search all columns...**: type a name or value to show only the matching rows.
2. **Export CSV**: downloads the table as a CSV file (opens in Excel).
3. **Export as PDF**: downloads the table as a PDF.
4. **Column headings** (**Salesperson**, **Actual**, **Target-to-date**, **Variance**, **Status**): click the arrows next to a heading to sort by it.
5. **Filter...**: the box under each heading filters that column only. For example, type Critical under **Status**.
6. **Row count**: how many rows match.
7. **Rows per page** (**10 / page** ... **100 / page**), **Prev**, **Next** and the page number.

A salesperson with no target shows **—** and the status **No Target**.

To return to the Tachometer, click **Back** (the arrow) in the header, or the **Tachometer** tab.

> **NOTE**
>
> Because your data is limited to your own record, your breakdown shows a single row: you. **Total Groups** is 1, and you are both the **Top Performer** and **Needs Attention**.

Tips

> **TIP**
>
> The **target-to-date** grows every day through the year. A salesperson can be **On Track** on the YTD card while **Critical** on the MTD card, which means this month is slower than the rest of the year.

> **TIP**
>
> Turn on light mode (the moon icon) before taking a screenshot or printing the page. It's easier to read on paper.

> **WARNING**
>
> Figures are only as recent as the last data refresh (see How often the data is refreshed). Sales entered in the last few hours may not be included yet.

Reports and exporting

Every report is generated on screen, live, from the filters you choose. To keep or share a report, export it.

Export types

Button	Where you find it	File you get
Export PDF / **Export as PDF**	Next to **Performance Details** tables and other detail tables	A PDF of the table, including every row (on several pages if needed). The first page records the **filters applied** and who exported it (**Exported by**: your email).
Export CSV	On large tables, such as the Tachometer **Full Breakdown**	A CSV file (comma-separated values) that opens in Microsoft Excel. Arabic and special characters are kept.

Exporting a report, step by step

1. Open the report.
2. Set the filters you need (see The filter bar). **The export contains exactly what the report shows for those filters**, including the date range.
3. Scroll to the table you want.
4. Click **Export PDF** or **Export CSV**.
5. While the file is prepared, the button may show **Exporting…**. Wait until it finishes.
6. Your browser saves the file.

The file name describes the content. For example, a YTD Value breakdown by salesperson is saved as `ytdValue-breakdown-by-salesperson.csv`.

Where exported files are saved

Files are saved to your browser's **Downloads** folder, normally **This PC › Downloads** on Windows or **Downloads** on a Mac.

- **Chrome / Edge:** press **Ctrl + J** (Windows) or **⌘ + Shift + J** (Mac) to see recent downloads, then click **Show in folder**.
- If your browser is set to "Ask where to save each file", it asks you to choose a folder first.

Printing

The dashboard has no Print button of its own. To print a report:

1. Export it with **Export PDF** / **Export as PDF**.
2. Open the PDF from your **Downloads** folder.
3. Print it from your PDF viewer (**Ctrl + P** / **⌘ + P**).

TIP

To print a whole screen as it looks, switch to light mode first, then use your browser's **Print** (**Ctrl + P**) and choose **Landscape**. For tables, the PDF export gives a cleaner result.

WARNING

Exported files contain company sales data. Store them only in approved company locations and don't send them outside the company.

NOTE

Your exports contain only your own data, the same as your screen.

Troubleshooting and FAQ

Common problems

Problem	Likely cause	What to do
I can't sign in: **Invalid email or password.**	Wrong email or password, Caps Lock on, or the wrong keyboard language.	Re-type carefully. After 5 wrong attempts your account is locked, so stop and contact the administrator if you are unsure.
Your account is locked. Contact your administrator.	Too many wrong passwords, or locked by the administrator.	Contact the administrator.
I forgot my password.		Contact the administrator. A reset needs administrator confirmation (see Forgotten password).
The page only shows **Loading...**	Slow connection, or the session is being checked.	Wait a few seconds. Then reload the page (**F5**). If it continues, sign out and sign in again.
A chart says **This chart could not load.** or the page says **This page could not load.**	A temporary server or network problem.	Click **Retry**, or reload the page.
A card shows **No rows for the current filters.** or **No data for the selected filters**	The filters are too narrow.	Click **Reset filters**, or widen the date range.
A filter list is greyed out with **No options**	No values exist for your other selections.	Change or reset the other filters.
The figures don't include today's latest sales.	The data is refreshed on a schedule.	Check the refresh times (08:50, 11:50, 14:50, 17:50, 20:50) and reload the page after the next refresh.
My figures differ from another report or system.	Different filters or date ranges, or data not yet refreshed.	Check both reports use the same **From/To Date**, **Company** and **Customer Group** (the default is B2B + B2C).
The filters are greyed out with **Locked to your assigned scope**.	This is normal. Salesperson accounts see their own data only.	Use **From Date** and **To Date** to change the period.
I see another salesperson's name, or no data at all.	Your account may not be linked to your salesperson record.	Contact the administrator.
The screen is dark and hard to read.	The dashboard opens in dark mode.	Click the moon icon in the header to switch to light mode.
The export button does nothing.	The browser blocked the download.	Allow downloads for dashboards.benmussaholding.com in your browser settings, then try again.

Problem	Likely cause	What to do
I was signed out unexpectedly.	Your password was changed or reset, or the administrator ended your session.	Sign in again.

Frequently asked questions

Is the data live? No. It is refreshed five times a day (08:50, 11:50, 14:50, 17:50 and 20:50), with a full rebuild every night at 02:00.

Do I need to sign in every day? No. There is no automatic time-out, so you stay signed in on that browser until you click **Log out** (see Session timeout). Always sign out on shared computers.

Can I use the dashboard on my phone? Yes. Open the same address in your phone's browser. The layout adapts to the smaller screen. You can also install it as an app on your phone (see the tip in Opening the dashboard).

Is there an Arabic interface? Not yet. The screens are in English only.

What does the bell icon do? Notifications will be available in a future release. The bell doesn't do anything yet.

Why does the Tachometer target change every day? The target shown on the gauge is the **target-to-date**, the share of the period's target due by the selected date. It grows as the year or month goes on.

Can I save my filter choices? Not at present. Filters stay applied while you move between reports, and go back to their defaults when you reload the page.

Why can't I see other salespersons or other reports? Salesperson accounts are limited, by design, to your own Tachometer data. This protects everyone's data.

Glossary

Term	Meaning
7Ps	The seven parts of the marketing mix used to organise the dashboard: Product, Price, Place, Promotion, People, Process, Physical Evidence.
Actual	The real figure achieved in the selected period.
ASP	Average Selling Price: sales value ÷ volume sold.
B2B / B2C	Business-to-business and business-to-consumer customer groups.
Behind Target / Watch	Amber status: below target by 10% or less.
Critical / Off target	Red status: below target by more than 10%.
CSV	Comma-separated values, a table file that opens in Excel.
Customer Group	Customer segment (for example B2B, B2C).
Distribution Channel	The route through which a sale is made.
FMT	Full-Month Target: the whole current month's target.
FY / FM Target	Full-Year / Full-Month Target.
FYT	Full-Year Target.
K / M	Thousand / million (for example LYD 14.1M = 14.1 million Libyan dinars).
LFM	Last Full Month: the actual of the previous complete calendar month.
LFY	Last Full Year: the actual of the previous complete calendar year.
LMTD	Last-year Month-To-Date: the same month last year, up to the same day.
LYD	Libyan Dinar.
LYTD	Last Year-To-Date: 1 January to the same day, last year.
MTD	Month-To-Date: from the 1st of the month to the selected date.
On Track / On target / On Pace	Green status: target reached or exceeded.
Performance Details	The summary table at the bottom of most reports.
Refresh	The scheduled update of dashboard data from company systems.
Salesperson	The person credited with a sale.
SKU	Stock Keeping Unit: a single product item.
Status badge	The coloured label (green / amber / red / grey) on a card.
Target-to-date	The part of the target that should have been reached by the selected date.
Variance	The difference between two figures as a %, for example actual vs target or this year vs last year. Positive means higher.

Term	Meaning
Volume	Quantity sold (units).
YTD	Year-To-Date: from 1 January to the selected date.

Support contact

For help with the dashboard (sign-in problems, password resets, access to reports, or questions about the figures), contact:

Name	Nahla Burweiss
Role	Data Analyst
Email	nahla.burweiss@bmh.com.ly

When you report a problem, please include:

1. The **email** you sign in with.
2. The **report** name and the **filters** you used.
3. The **date and time** it happened.
4. The **exact message** on screen, or a screenshot.
