Introduction

What the 7Ps Dashboard is for

The **BMH 7Ps Dashboard** is Ben Mussa Holding's business-intelligence website. It turns sales, pipeline, marketing and product data from the company's systems into clear, up-to-date reports you can open in a web browser, with nothing to install.

The dashboard is organised around the **7Ps** of the marketing mix. Each "P" is a department:

Department ("P")	Business area	Status at launch
Promotion	Commercial Department (sales performance)	Live
Product	Production Department (product portfolio and stock)	Live
Price	Finance Department	Coming Soon
Place	Supply Chain Department	Coming Soon
People	Human Resource Department	Coming Soon
Process	Excellence Department	Coming Soon
Physical Evidence	HSE Department	Coming Soon

At launch, the **Promotion** department has 12 reports and the **Product** department has 4. All of them are described in this manual.

Who this manual is for

This manual is for **full-access users**: managers, directors and analysts who can open every report in the Promotion and Product departments. It covers the whole journey, from signing in to reading each report, filtering the data and exporting results.

Administration screens (user management, reference data, data loading) are not covered here.

You don't need any technical knowledge to use the dashboard or this manual.

How to use this manual

- Button names, menu items, field names and messages are written in **bold**, exactly as they appear on screen. For example: click **Sign in**.
- Step-by-step procedures are numbered. Follow the steps in order.
- Numbered red circles on a screenshot match the numbered list under it.
- Screenshots use sample data: names and figures have been replaced, so the numbers you see on your screen will differ.

Three kinds of boxes highlight important information:

NOTE

Extra information that helps you understand how something works.

TIP

A shortcut or a better way to do something.

WARNING

Something that could cause a problem or an unexpected result if you ignore it.

Getting started

What you need

Item	Requirement
Web browser	A current version of **Google Chrome** or **Microsoft Edge** (recommended), **Mozilla Firefox** or **Safari**. Keep your browser up to date.
Screen	A laptop or desktop screen (1280 pixels wide or more) gives the best view. The dashboard also works on tablets and phones, with the menus rearranged to fit.
Network	Internet access to `https://dashboards.benmussaholding.com`
Account	A user account created by the system administrator. There is no self-registration.
PDF reader	Any PDF viewer (for example your browser or Adobe Acrobat Reader) to open exported reports.

Opening the dashboard

1. Open your web browser.
2. Go to **https://dashboards.benmussaholding.com/Dashboard**
3. If you are not signed in, the **Sign in** page opens.

> **TIP**
> Add the address to your browser's bookmarks or favourites so you can open it in one click.

Signing in

[Screenshot pending: shots/login.png]

1. **Email**: type the email address of your dashboard account.
2. **Password**: type your password. The characters are hidden as you type.
3. Click **Sign in**. The button shows **Signing in…** while your details are checked.
4. **Forgot your password?**: see Forgotten password below.

When you have signed in, the **7Ps Dashboard Hub** (home page) opens.

Sign-in messages

Message	What it means	What to do
Invalid email or password.	The email or the password is wrong.	Check the spelling, the **Caps Lock** key and the keyboard language, then try again.
Your account is locked. Contact your administrator.	Your account has been locked, for example after 5 wrong passwords in a row, or by an administrator.	Contact the administrator (see Support). Only the administrator can unlock it.
Your account is inactive. Contact your administrator.	Your account has been switched off.	Contact the administrator.
Too many attempts. Please try again later.	Too many sign-in attempts were made from your connection in a short time (more than 10 in 15 minutes).	Wait 15 minutes, then try again.
Something went wrong. Please try again.	A temporary network or server problem.	Check your internet connection and try again. If it continues, contact support.

WARNING

After **5 wrong passwords in a row**, your account is locked automatically. If you are not sure of your password, stop and contact the administrator before you are locked out.

First-time sign-in: setting your own password

New accounts are created with a temporary password. The first time you sign in, the dashboard asks you to replace it before you can open any report.

[Screenshot pending: shots/change_password.png]

1. **Current password**: type the temporary password you were given.
2. **New password**: type a new password. It must be **at least 8 characters long** and contain **at least one letter and one number**.
3. **Confirm new password**: type the new password again, exactly the same.
4. Click **Save new password**. The dashboard opens.
5. **Sign out instead**: leaves without changing the password. You will be asked again next time.

Message	What to do
New password and confirmation do not match.	Type the same new password in both boxes.
Password must be at least 8 characters long.	Use a longer password.

Message	What to do
Password must contain at least one letter and one number.	Add a letter or a number.
Current password is incorrect.	Re-type the temporary password exactly as you received it.

> **TIP**
>
> Choose a password you have not used elsewhere, and do not share it. Your data access is personal to your account.

Forgotten password

Password resets need **administrator confirmation**.

1. Contact the system administrator (see Support contact) and ask for a password reset for your account email.
2. When the administrator has confirmed the reset, you'll receive a temporary password or a reset link.
3. Sign in with it. The dashboard then asks you to set a new password, as described in First-time sign-in.

> **NOTE**
>
> The **Forgot your password?** link on the Sign in page opens a **Forgot password** screen with an **Email** box and a **Send reset link** button. For security, the screen always shows the same message: "If that email exists in our system, a password reset link has been sent." It shows this whether or not the email exists. A reset link is valid for **60 minutes**. If you don't receive anything, contact the administrator.

Changing your password

There is no menu item for changing your password. To change it yourself:

1. While signed in, type this address in your browser: **https://dashboards.benmussaholding.com/Dashboard/change-password**
2. Fill in **Current password**, **New password** and **Confirm new password**, using the same rules as above.
3. Click **Save new password**.

> **NOTE**
>
> Changing your password signs you out on your other devices and browsers. Sign in there again with the new password.

Signing out

1. Click the **Log out** icon (an arrow leaving a door) at the far right of the header.
2. The **Sign in** page opens. Your session on this browser is ended.

> **WARNING**
>
> Always sign out on a shared or public computer. If you only close the browser tab, you stay signed in on that computer.

Session timeout (how long you stay signed in)

> **NOTE**
>
> **The dashboard has no automatic time-out for inactivity.** After you sign in, you stay signed in on that browser, even if you close it and come back days later, until one of these happens:
>
> - you click **Log out**;
> - you change your password (you are signed out everywhere else);
> - the administrator resets your password, locks your account or ends your sessions;
> - 365 days have passed since you signed in.
>
> If your session ends while you are working, the page shows **Your session has expired.** or returns to **Sign in**. Just sign in again. Your filters go back to their defaults.

Interface overview

The 7Ps Dashboard Hub (home page)

The hub is the first page after you sign in. Click **Home** in the sidebar to return to it at any time.

[Screenshot pending: shots/hub.png]

1. **Header**: logo, page title and your account (see The header below).
2. **Promotion** card (Commercial Department). Click **View KPIs** to open the Promotion reports.
3. **Product** card (Production Department). Click **View KPIs** to open the Product reports.
4. Departments marked **Coming Soon** are not available yet.

Page layout

Every report page has the same layout:

[Screenshot pending: shots/layout.png]

1. **Sidebar**: moves between departments.
2. **Header**: page title and your account controls.
3. **Filter bar**: chooses the dates and the part of the business the report shows.
4. **Report area**: KPI cards, charts and tables.
5. **Bottom tab bar**: moves between the reports of the current department.

The sidebar

The dark sidebar on the left lists **Home**, the seven departments (**Promotion**, **Product**, **Price**, **Place**, **People**, **Process**, **Physical Evidence**) and, for administrators only, **Admin**. The current department is highlighted.

- Click a department to open its list of reports.
- Click the **«** button at the bottom (**Collapse sidebar**) to shrink the sidebar to icons and give the report more room. Click it again to expand it.

> **NOTE**
> On a tablet the sidebar shows icons only. On a phone it opens as a menu.

The header

[Screenshot pending: shots/header.png]

#	Control	What it does
1	**BMH logo**	Shows the company. When you filter a single company, the logo of that business unit may be shown.
2	**Page title**	The name of the page you are on, for example **Promotion Dashboard** on the Tachometer.
3	**Back** (arrow)	Returns to the page you were on before, like the browser's back button.
4	**Theme** (sun / moon)	Switches between **light mode** and **dark mode**. The dashboard opens in dark mode. Your choice applies until you reload the page.
5	**Notifications** (bell)	Reserved for notifications. **This feature will be available in a future release**, so clicking the bell does nothing for now.
6	**Profile chip**	Your initial and name. Point at it to see your role ("Signed in as: ...").
7	**Log out**	Signs you out (see Signing out).

> **TIP**
> Light mode is easier to read in bright rooms and uses less ink if you print the screen.

The bottom tab bar

The bar along the bottom of every report shows one tab per report in the current department. The current report is underlined. Click a tab to open that report. If there are more tabs than fit on the screen, scroll the bar sideways.

The filter bar

Filters decide **which period** and **which part of the business** a report shows. The filter bar sits under the header and is **collapsed** when a page opens.

[Screenshot pending: shots/filterbar.png]

#	Control	What it does
1	**Filters** and badge	The number in the circle is how many filters are currently narrowing the data.
2	**From Date**	First day of the period. Defaults to 1 January of the current year.

#	Control	What it does
3	**To Date**	Last day of the period. Defaults to today. It cannot be later than today.
4	**Company**	Majaal, Tika, or both (**All**).
5	**Customer Group**	Customer segments such as B2B and B2C. Defaults to **2 selected** (B2B and B2C).
6	**Distribution Channel**	The sales channel.
7	**Branch**	The selling branch.
8	**Salesperson**	One or more salespersons.
9	**Reset filters**	Puts every filter back to its default. It is greyed out when nothing has been changed.
10	**Show filters / Hide filters**	Opens or closes the filter bar.
11	**Last Order Date / Last Order Created**	Shows how fresh the data is: the date of the latest order included in the report.

Using the filters

1. Click **Show filters** at the right end of the filter bar.
2. To change a date, click **From Date** or **To Date** and pick a day in the calendar.
3. To filter a list, click it (for example **Branch**) and tick one or more values. The field then shows the value, or "n selected".
4. The report updates automatically. You don't need to press a button.
5. Click **Hide filters** to give the report more room. The badge still shows how many filters are active.

> **NOTE**
>
> **Filters work together.** When you choose a value in one list, the other lists only offer values that still have data. For example, choosing a branch narrows **Salesperson** to the people who sell in that branch. If a selection no longer has any data, it is removed automatically.

> **NOTE**
>
> **Filters carry across reports.** The same filters stay applied as you move between reports in the same session. They go back to their defaults when you reload the page or sign in again. Some reports use their own filters, and these are described in each chapter.

Pages with different filter controls

Report	Differences
Critical Number	One **Date** instead of From/To. The counters are calculated up to that day.
Pipeline Health, Pipeline Trend, Activity Momentum	Year-to-date data only: **From Date** cannot be earlier than 1 January of the current year.

Report	Differences
Customer Growth, Invoices Engine	An extra **Customer** filter appears. It applies to the current report only.
MARCOM reports	Their own filters: **Year**, **From** / **To** month, **Brand** and **Reset** (see the MARCOM chapters).
BCG Matrix	The standard filter bar (dates, Company, Customer Group, Distribution Channel, Branch, Salesperson).
Stock Velocity, PIM Contribution, Product Lifecycle	Their own product filters above the report, such as **Company**, **Category**, **BCG Class**, **Stock Band** or **Lifecycle Segment**. They show current stock and year-to-date product data, so there is no date range.

> **TIP**
>
> A list that is greyed out with **No options** has no values for the current selection. Widen your other filters or click **Reset filters**.

Colours and status badges

The dashboard uses the same three colours everywhere to compare an actual figure with its target:

Colour	Badge text	Meaning
Green	**On Track** / **On target** / **On Pace**	The target has been reached or exceeded.
Amber	**Behind Target** / **Watch** / **Behind Pace**	Below target, by **10% or less**.
Red	**Critical** / **Off target** / **Underperforming**	Below target by **more than 10%**.
Grey	**No Target** / **n/a**	No target has been set, or there isn't enough data to compare.

In charts, the **actual** figures are navy blue, **last year** is grey and the **target** is red.

Tables

Report tables share the same controls:

- **Sort**: click a column heading to sort by that column. Click it again to reverse the order.
- **Rows per page**: choose **10 / page**, **25 / page**, **50 / page** or **100 / page**.
- **Prev** / **Next**: move between pages. "Page 1 of 5" shows where you are.
- **View as table / View as chart** (on charts): shows the figures behind a chart as a table, then switches back.
- **Expand … to table view**: the expand icon on a chart card opens the same figures as a table.

How often the data is refreshed

The dashboard doesn't show live, second-by-second data. It is refreshed automatically from the company's systems on a fixed schedule (Libya time, Africa/Tripoli):

Refresh	When	What it does
Incremental refresh	Every day at **08:50, 11:50, 14:50, 17:50 and 20:50**	Adds the latest orders, invoices and pipeline activity. Takes a few minutes.
Full refresh	Every night at **02:00**	Rebuilds all sales and product data from scratch.
MARCOM data	**Monthly**, when the Marketing department uploads its workbook	The four MARCOM reports show "Data as of month — uploaded by name on date".

So the figures you see are normally at most about three hours old during the working day. To check how fresh a report is, look at **Last Order Date** and **Last Order Created** in the filter bar, or the "Data as of ..." line on MARCOM reports.

> **TIP**
> If a sale you expect is missing, check the time of the last refresh. A sale entered at 10:00 appears after the 11:50 refresh. Reload the page (**F5**) after a refresh to see the new figures.

> **NOTE**
> The dashboard interface is in **English only**. There is no language switch.

Promotion: Tachometer

Purpose

The **Tachometer** shows at a glance whether sales are on target, year-to-date (YTD) and month-to-date (MTD). Each figure appears as a speedometer-style gauge with green, amber and red zones.

To open it: in the sidebar click **Promotion**, then click the **Tachometer** card, or the **Tachometer** tab in the bottom bar. The page title in the header is **Promotion Dashboard**.

What's on the page

[Screenshot pending: shots/tach_top.png]

The top of the page has six cards:

#	Card	What it shows
1	**YTD Value**	Sales value (LYD) from 1 January to the **To Date**, against the target for the same period.
2	**YTD Actual ASP**	Average Selling Price year-to-date (sales value ÷ volume), against the ASP target.
3	**YTD Volume**	Quantity sold year-to-date, against the volume target.
4	**MTD Value**	Sales value from the 1st of the month to the **To Date**.
5	**MTD Actual ASP**	Average Selling Price month-to-date.
6	**MTD Volume**	Quantity sold month-to-date.

Reading a gauge card

[Screenshot pending: shots/tach_gauge.png]

1. **Card name**, for example **YTD Value**.
2. **Status badge**: **On Track** (green), **Behind Target** (amber) or **Critical** (red). See Colours and status badges.
3. **Actual**: the big number, for example LYD 112.4M. (**K** = thousand, **M** = million.)
4. **Target-to-date**: the small figure at the top of the gauge. This is the target for the period so far, not the full-year target.
5. **Needle**: points at the actual figure. The coloured arc is red below 90% of target, amber from 90% to 100%, and green above 100%.

6. **Scale ends**: the left end is half the target (50%) and the right end is one and a half times the target (150%).
7. **Progress bar and %**: actual as a percentage of target-to-date. 100% means the target is reached.
8. **Trend line**: a small chart of the month-by-month pattern.
9. **Comparison row**: - **YTD cards**: **LYTD** (last year, same period), **LFY** (last full year's actual), **FYT** (full-year target) and **Variance** (change compared with LYTD). - **MTD cards**: **LMTD** (the same month last year, up to the same day), **LFM** (the previous full calendar month's actual), **FMT** (full-month target for the current month) and **Variance** (change compared with LMTD).

Reading an ASP card

The **YTD Actual ASP** and **MTD Actual ASP** cards show the average selling price in LYD, the **Target** ASP, the **Variance** compared with the same period last year, and a small trend chart. The status badge compares the actual ASP with the target.

Performance Details tables

Scroll down to see two **Performance Details** tables, one for value and one for volume and ASP.

[Screenshot pending: shots/tach_perf.png]

Column	Meaning
Metric Name	For example YTD Value, MTD Volume, Full Last Year Value.
Actual	The figure for the selected period.
LYTD	The same period last year (for MTD rows, the same month last year).
Target	The target for the same period.
Variance to LYTD	% change compared with last year's same period. Positive means growth.
Variance to Target	% above (+) or below (−) target.
Status	The status badge.

The date and time under **Performance Details** show when the table was produced. Click **Export PDF** next to a table to download it (see Reports and exporting).

Changing the period

1. Click **Show filters**.
2. Change **To Date** to the day you want to measure up to. For example, choose 30 June to see the position at the end of June.
3. The YTD cards then show 1 January to 30 June, and the MTD cards show 1 June to 30 June.

You can also narrow the Tachometer to a **Company**, **Customer Group**, **Distribution Channel**, **Branch** or **Salesperson** (see The filter bar).

> **NOTE**
> The YTD and MTD windows are always worked out from the **To Date**. YTD starts on 1 January of that date's year, and MTD starts on the 1st of that date's month.

Opening a breakdown

Each **Value** and **Volume** gauge card can be opened to see who is contributing to the figure.

1. Click anywhere on the **YTD Value**, **YTD Volume**, **MTD Value** or **MTD Volume** card.
2. The breakdown page opens, for example **YTD Value — Breakdown**, keeping your current filters.

[Screenshot pending: shots/tach_breakdown.png]

1. **Summary gauge**: the same figure as on the Tachometer, with **Variance** to target and the **FY/FM Target** (full-year or full-month target).
2. **Total Groups**: how many salespersons are included.
3. **On Target**: how many of them have reached their target.
4. **Critical**: how many are more than 10% below target.
5. **Top Performer**: the salesperson furthest above target, with their variance.
6. **Needs Attention**: the salesperson furthest below target.

The Full Breakdown table

[Screenshot pending: shots/tach_breakdown_table.png]

1. **Export CSV**: downloads the table as a CSV file (opens in Excel).
2. **Export as PDF**: downloads the table as a PDF.
3. **Column headings** (**Salesperson**, **Actual**, **Target-to-date**, **Variance**, **Status**): click one to sort.
4. **Rows count and rows per page** (**10 / page** … **100 / page**).
5. **Prev** / **Next** to move between pages.

A salesperson with no target shows **—** and the status **No Target**.

To return, click **Back** in the header, or **Back to Tachometer** if it is shown.

Tasks

Check whether you are on target this month

1. Open the **Tachometer**.

2. Look at the **MTD Value** card. The badge tells you the status, and the % next to the progress bar shows how much of the month's target-to-date is achieved.
3. Compare the actual with **FMT** (full-month target) to see how much is still needed this month.

Compare with last year

1. On the **YTD Value** card, compare the big number with **LYTD**.
2. **Variance** shows the growth. For example, +12% means 12% more than the same period last year.

Look back at a past month-end

1. Click **Show filters**.
2. Set **To Date** to the last day of that month.
3. Read the **MTD** cards for that month and the **YTD** cards up to that day.
4. Click **Reset filters** to return to today.

Find the salespersons who most need support

1. Click the **YTD Value** card.
2. In **Quick Insights**, read **Needs Attention** and the **Critical** count.
3. In **Full Breakdown**, click **Variance** to sort from lowest to highest.
4. Click **Export CSV** to share the list.

Tips

> **TIP**
>
> The **target-to-date** grows every day through the year. A salesperson can be **On Track** on the YTD card while **Critical** on the MTD card, which means this month is slower than the rest of the year.

> **TIP**
>
> Turn on light mode (the moon icon) before taking a screenshot or printing the page. It's easier to read on paper.

> **WARNING**
>
> Figures are only as recent as the last data refresh (see How often the data is refreshed). Sales entered in the last few hours may not be included yet.

Promotion: Critical Number

Purpose

Critical Number turns the annual sales target into a **required daily sales value**, the "critical number". It then tracks, for today, this month and this year, whether sales are keeping pace with it. It also counts working days, official holidays and forced branch closures.

To open it: Promotion › **Critical Number** card, or the **Critical Number** tab.

[Screenshot pending: shots/critical_top.png]

1. **Date** filter: the counters are calculated up to this day. It defaults to today.
2. **Daily Counter**: today's sales (**Achieved**) and what is still needed (**Remaining**) to reach the daily **Target**, the Daily Critical Number. **Variance** is the gap in %.
3. **Monthly Counter**: working days used this month (for example **21 / 26 Working Days**), **Achieved** and **Remaining** value for the month, and the pace line, for example "120% of pace achieved" and "+LYD 2.3M vs pace".
4. **Yearly Counter**: the same for the year so far.
5. **Export image**: saves that counter as a PNG picture.

The badge on each counter reads **On Pace** (green), **Behind Pace** (amber) or **Underperforming** (red).

The critical-number cards

[Screenshot pending: shots/critical_mid.png]

Card	Meaning
Daily Critical Number	The baseline daily sales target that every counter is measured against. It scales with the **Company** and **Customer Group** filters.
Working Days YTD	Working days so far this year, with the same period last year for comparison. Weekly rest days (Fridays) and official holidays are excluded.
Weekly Rest Days YTD	The standard weekly days off so far.
Official Holidays YTD	Public holidays so far. Click **HOLIDAY LIST** to see each holiday and its date.
Forced Closures YTD	Days a branch had to close (counted as branch-days). Click **BRANCH BREAKDOWN** to see which branches.

Card	Meaning
Missing Value YTD	Net gap against pace: (Working Days YTD × Daily Critical Number) minus actual YTD value. Positive means ahead of pace, negative means behind.
Missing Days YTD	The Missing Value expressed in days of sales (Missing Value ÷ Daily Critical Number).

The **Performance Details** table at the bottom summarises every metric with **Actual**, **Target**, **Variance to Target**, **Status** and a plain-language **Takeaway**. Click **Export PDF** to download it.

Tasks

See how many days of sales you are behind or ahead

1. Open **Critical Number**.
2. Read **Missing Days YTD**. For example, −4.5 means sales are 4.5 days' worth behind the required pace.

Check the position on a past date

1. Click **Show filters**.
2. Change **Date**.
3. All counters and cards recalculate up to that date.

> **NOTE**
> A forced closure at one branch does not reduce the company-wide **Working Days YTD**. It appears on its own card instead. Holidays and closures are maintained by the administrator.

> **TIP**
> If the Daily Counter shows almost nothing early in the day, that's normal. Today's sales are added at each refresh (08:50, 11:50, 14:50, 17:50, 20:50).

Promotion: Revenue Trend

Purpose

Revenue Trend shows sales **month by month** for the current year, compared with the **same month last year** and with the **target**, for Value, Volume and ASP.

To open it: Promotion › **Revenue Trend**.

[Screenshot pending: shots/revenue_top.png]

1. **Variance KPI cards**: **Value**, **Volume** and **ASP Variance to YTD Target**, and the same **to MTD Target**. Each card is green when the target is met and red when it isn't.
2. **MoM Value**, **MoM Volume** and **MoM ASP** charts: one point per month, with **Actual** in navy, **Y-1** (last year) in grey and **Target** in red. Months still to come show the target only, so you can always see the whole year.
3. Chart tools: **Export image** (PNG) and **Expand … to table view** (the monthly figures as a table: **Month**, **Actual**, **Y-1**, **Target**).

At the bottom, **Performance Details** lists each metric with **Actual**, **Last** (last year), **Target**, **Variance to Last**, **Variance to Target**, **Status** and **Takeaway**, with **Export PDF**.

Task: find the months that missed target

1. Open **Revenue Trend**.
2. On **MoM Value**, look for months where the navy line is below the red target line.
3. Click the expand icon to see the exact figures in a table.

Promotion: Invoices Engine

Purpose

Invoices Engine analyses **invoices**: how many were issued, how efficient they are (lines, value and volume per invoice), and how they split into value bands.

To open it: Promotion › **Invoices Engine**.

[Screenshot pending: shots/invoices_top.png]

1. **Invoice KPI cards**: **YTD / LYTD / MTD / LMTD Total # of Invoices**, **# of Lines per Invoice**, **Sales per Invoice** and **Volume per Invoice**.
2. **Sales Trend**: invoice sales value by year. **Click a year** to filter the whole page to that year. Click **Back to all years** to clear it.
3. **Invoices Trend**: number of invoices over time.

[Screenshot pending: shots/invoices_class.png]

Invoices Classification groups invoices by value:

Class	Band
High Value (A)	More than 50K LYD
Upper-Mid Value (B)	25K–50K LYD
Medium Value (C)	5K–25K LYD
Low Value (D)	Less than 5K LYD

Each band shows its total value, its share of the total and the number of invoices. **Click a band** to filter the page to that class. Use **Drill-down** to see the figures behind it.

This page also has the **Customer** filter, which applies to this page only.

Task: see how much of the business comes from large invoices

1. Open **Invoices Engine**.
2. In **Invoices Classification**, read the % of **High Value (> 50K LYD)**.
3. Click that band. The trends and KPIs now show high-value invoices only.

Promotion: Customer Growth

Purpose

Customer Growth tracks the **customer base**: new and total customers, customers kept and lost, which customers contribute most, and how customer categories perform.

To open it: Promotion › Customer Growth.

[Screenshot pending: shots/customer_top.png]

1. **Customer counts**: **New Customers** and **Total Customers**, for YTD, LYTD, MTD and LMTD.
2. **Customer Status**: the number of customers in each status (see the table below). Click **View Customer Status details** to open the customer list.
3. **Customers Trend**: total sales value and customer count by year. Click a year to filter the page to it.
4. **Customers Contribution**: the **Top 10 Customers** against **Other Customers**. Click either group to see the customers in it.

Customers Category Share (further down) shows sales by customer category. Click a category to see its customers, and use **Back to categories** to return.

Customer statuses

Status	Meaning
Active Retained	Bought this year (YTD) **and** in the same period last year (LYTD).
New	Bought this year, and had never bought before.
Reactivated	Bought this year, not in LYTD, but had bought before that.
Non Active	Bought in LYTD but **not** this year.
Blocked	Blocked in the company system, whatever they have bought.
Other	Doesn't fit any of the above.

Rates

Rate	How it is calculated
Customer Acquisition	Change in new customers compared with last year: (New YTD − New LYTD) ÷ New LYTD
Customer Growth	Change in total customers: (Total YTD − Total LYTD) ÷ Total LYTD
Retention Rate	(Active Retained + Reactivated) ÷ Total customers LYTD

Rate	How it is calculated
Churn Rate	Non Active ÷ Total customers LYTD

> **NOTE**
> Retention and Churn don't always add up to 100%. Reactivated customers count towards Retention but weren't part of last year's base.

Task: list the customers you have lost this year

1. Open **Customer Growth**.
2. Click **View Customer Status details**.
3. In the **Status Slicer**, choose **Non Active**.
4. The **Customers Table** lists them, with **Last Purchase Date**, **YTD Value** and **Customer Group / Class**. Click **Export as PDF** to share it.

> **TIP**
> Use the **Customer** filter to look at a single customer across the whole page.

Promotion: Pipeline Health

Purpose

Pipeline Health shows the state of the **sales pipeline** (CRM opportunities) this year: how opportunities move from opportunity to quotation to sales order to delivery, what is expected to close and when, and how likely each deal is to close.

To open it: Promotion › **Pipeline Health**. This page uses **year-to-date data only**.

[Screenshot pending: shots/pipeline_health.png]

1. **Full Pipeline**: a funnel of **Opportunities** ▮ **Quotations** ▮ **Sales Orders** ▮ **Deliveries**. Click a stage to list its records. Click **Opportunity chain** to follow each opportunity through to delivery, and use **Stage Benchmark** to compare each step's actual conversion % with its target %.
2. **Expected Closure Opportunity**: expected count and value by the month deals should close. Click a month to list those opportunities.
3. **Opportunity by Stage**: open opportunities by CRM stage. Click a segment to list them.
4. **Probabilities Distribution**: open opportunities grouped by win probability. Click a bucket to list them.

The opportunity list (**Opportunity Details**) shows **Opportunity Name**, **Stage**, **Probability %**, **Expected Close Date**, **Value**, **Customer**, **Company**, **Salesperson** and **Created Date**, with **Download as PDF**. Click **Back** to return to the charts.

> **NOTE**
>
> Won and lost opportunities are left out of the pipeline views, because they are no longer "in the pipeline". The **Data Quality** notes on this page are shown to administrators only.

Promotion: Pipeline Trend

Purpose

Pipeline Trend shows how opportunities, quotations and sales orders develop **month by month**, how quickly quotations are won, and how old the open items are.

To open it: Promotion › **Pipeline Trend** (year-to-date data only).

[Screenshot pending: shots/pipeline_trend.png]

1. **Quotation Rates**: **Total Quotations YTD**, **Won Quotations YTD**, **Lost Quotations YTD**, **Open Quotations YTD**, **Win Rate YTD** and **Won/Lost Ratio YTD**.
2. **Open Opportunities & Quotations by Aging**: open items grouped by age: **0-30 days**, **30-60 days**, **60-90 days** and **90+ days**.
3. **Opportunities**, **Quotations** and **Sales Orders**: monthly counts and values (**#YTD**, **Value YTD**).

Performance Details at the bottom lists each metric with **Actual**, **Target**, **Variance%**, **Variance LY**, **Trend**, **Status** and **Takeaway**.

> **TIP**
>
> A large **90+ days** bar means quotations are ageing without a decision. Follow them up with the salespersons concerned.

Promotion: Activity Momentum

Purpose

Activity Momentum shows whether opportunities are being **actively worked**: how many are active, won, lost, or stalled, and why deals are lost.

To open it: Promotion › **Activity Momentum** (year-to-date data only).

[Screenshot pending: shots/activity.png]

1. **Opportunity Status**: **#Active**, **#Won**, **#Lost**, **#W/O Activity** and **#W/O Next Step**, with **Inactive Deals Ratio** and **Lost Deals Ratio**.
2. **Total Lost Opportunity by Reason**: why opportunities were lost.
3. **New Opportunities**: opportunities created per month.

Term	Meaning
#W/O Activity (without activity)	Open B2B opportunities that have never had a quotation, 30 days or more after they were created.
#W/O Next Step (without next step)	Open B2B opportunities that had a quotation, but nothing has happened for 30 days or more since the last quotation.
Inactive Deals Ratio	Opportunities without activity **or** without a next step (each counted once), as a share of open B2B opportunities.
Lost Deals Ratio	Lost opportunities as a share of all opportunities this year.

Click **View Opportunity Activities details** to open the **Opportunity Table** (**Created Date**, **Opportunity Name**, **Customer**, **Company**, **Expected Revenue**, **Salesperson**, **Stage**). Use the **Activity Filter** to show only **Active**, **Lost**, **Won**, **Inactive** or **Without Next Step** opportunities. **Opportunity Activities definitions** explains each term on screen.

Promotion: MARCOM reports

The four **MARCOM** (Marketing Communications) reports show the Marketing department's contribution. Their data comes from a **monthly workbook** uploaded by the Marketing department, not from the sales system.

Shared controls on MARCOM pages

[Screenshot pending: shots/marcom_filters.png]

1. **Data as of … — uploaded by … on …**: which month the data runs to, who uploaded it and when.
2. **Upload data**: for the Marketing administrator only. Other users should not use it.
3. **Year**: the year to show. The previous year is used for comparisons.
4. **From** and **To**: the first and last month of the period.
5. **Brand** (on some pages **Platform** or **Campaign status**): narrows the page.
6. **Reset**: puts the MARCOM filters back to their defaults.
7. Every KPI card shows a status (**On target**, **Watch**, **Off target**, **No target**), the change **vs previous** (**improving**, **worsening**, **unchanged**), and **View as table**.

> **NOTE**
> The MARCOM filters are separate from the sales filter bar. **Company**, **Branch** and similar filters don't apply to these pages. If a page shows **No MARCOM data uploaded yet**, the workbook for that period hasn't been loaded yet.

MARCOM Spending

Shows how the marketing budget is spent and what it returns.

[Screenshot pending: shots/marcom_spending.png]

- **Total Spend vs Total Revenue**: marketing spend against **Revenue Attributed to Marketing**. Tick **Overlay company revenue** to add **Total Company Revenue**.
- **ROI trend — YTD vs LYTD**: return on investment this year against last year. Green is above the target ratio, red below.
- **Budget utilization by brand**: spend as a % of budget. The line marks **100% of budget**, and brands above it are **Over budget**.
- **Brand growth**: each brand's current figure against last year.
- **CAC — Customer Acquisition Cost** and **CPC — Cost per Click**, including CAC as a % of the average invoice and CPC by brand.

Media Campaign Performance

Shows the performance of advertising campaigns and outdoor media.

[Screenshot pending: shots/marcom_campaigns.png]

- **Spend vs Revenue by Campaign**: each campaign's spend and revenue, shown as **Bars** or **Bubbles**.
- **Total Spend vs Revenue Rate**: revenue ÷ spend for all campaigns together.
- **ROI by Campaign**: ROI per campaign, coloured green (above target), amber or red.
- **Campaign timeline**: when each campaign ran. Point at a bar for its dates, brand, spend, revenue and ROI.
- **Geographic coverage by type** and **Cost by type**: outdoor media such as **Billboards**, **Mega Billboards**, **Bridge Banners**, **Street Lights** and **Light Screen**, with **Units** and **Cost per unit**.

Digital Performance

Shows social media and website performance.

[Screenshot pending: shots/marcom_digital.png]

- **Followers / Likes by platform**: Facebook, Instagram, LinkedIn, TikTok and Google, with the Meta total (Facebook + Instagram).
- **CTR — Click-through rate** and **Engagement Rate**, overall and by platform.
- **Organic vs Paid engagement per month**: shown **Stacked** or **Grouped**, with the organic share.
- **Bounce Rate** (lower is better) and **Average Session Duration** for the website.

Trade Marketing & Retail

Shows in-store and event marketing.

[Screenshot pending: shots/marcom_trade.png]

- **Compliance Rate**: how well retail points follow merchandising standards. The card shows the latest month and the average for the period.
- **Giveaways Stock** and **Printed Materials Stock**: stock levels of marketing materials.
- **Events by type — per month**: events by category (Professionals, Architects/Designers, Corporate, CSR, Entertainment, Launch & Opening, Internal/Trainings, Exhibitions). Choose **Include planned** or **Completed only**. Cancelled events are excluded.

- **Events timeline — plan vs completion**: planned against completed events, as a **Timeline** or a **Table** (**Event**, **Type**, **Brand**, **Planned**, **Completion**).
- **Attendance Rate**: actual attendance against expected attendance.

Product: BCG Matrix

Purpose

The **BCG Matrix** classifies every sellable product (SKU) into one of four portfolio classes, based on how much of it sells (volume) and how profitable it is (gross profit %). It also shows how each product's class has moved since last year.

To open it: in the sidebar click **Product**, then the **BCG Matrix** card or tab.

[Screenshot pending: shots/bcg_top.png]

1. **STARS**: high volume **and** high profit.
2. **CASH COWS**: high volume, lower profit.
3. **STRATEGIC**: lower volume, high profit.
4. **DOGS**: lower volume and lower profit.
5. **Top 10 products per class** by Revenue YTD. The bar length is relative to the class's top product. Point at a row to see Volume, ASP, GP%, Vol Growth and Movement. "+n more SKUs in this class" shows how many aren't listed.

Each class card shows the number of products, their revenue YTD and the change compared with LYTD.

How products are classified

	Gross profit ≥ 35%	Gross profit < 35%
High volume (YTD units at or above the company threshold)	**Stars**	**Cash Cows**
Low volume	**Strategic**	**Dogs**

The volume threshold differs by company: **3,500 units YTD for Majaal** and **25,000 units YTD for Tika**. Packaging and input categories (**Paper Bags**, **Raw Materials**) are not classified.

Portfolio Movement

The movement chips compare each product's class this year with last year:

Movement	Meaning
New	First sold within the last 12 months.
Stable	Same class as last year, or a sideways move between Cash Cows and Strategic.
Improved	Moved to a better class (for example Dogs → Strategic, or Cash Cows → Stars).
Drop	Moved to a worse class.

Movement	Meaning
Discontinued	Sold last year but has no sales this year.

Click a chip, for example **Drop 125 SKUs**, to list those products.

Product Detail table

[Screenshot pending: shots/bcg_table.png]

1. **Export CSV**: downloads the table.
2. Column headings (**Product Name**, **Category**, **BCG Class**, **Movement**, **Revenue YTD**, **Revenue LYTD**, **Volume YTD**, **ASP**, **GP%**, **Vol Growth**): click to sort.
3. The search and filter box under each heading narrows the rows.

Performance Details at the bottom summarises the portfolio, with **Export PDF**.

This report uses the standard filter bar: dates, **Company**, **Customer Group**, **Distribution Channel**, **Branch** and **Salesperson**.

> **NOTE**
>
> Classes are always based on each product's whole-company figures. Filtering by a branch or salesperson shows which products they sell, but doesn't reclassify the products.

Product: Stock Velocity

Purpose

Stock Velocity shows how fast stock is selling, which products are **overstocked** (tying up money) and which are at **risk of running out**.

To open it: Product › Stock Velocity.

[Screenshot pending: shots/stock_top.png]

1. **KPI cards**: - **Avg Days of Inventory**: how many days current stock would last at the current sales rate. - **Overstocked SKUs**: the number of products above the overstock limit, and the value tied up. - **Stock-Out Risk SKUs**: products below the minimum, and the sales value at risk. - **Fast Movers (top velocity tercile)**: the fastest-selling third of products. - **Current Stock** (units) and **Inventory Value** (LYD).
2. **Fast vs Slow Movers**: average daily sales of fast and slow movers.
3. **Overstock Products** and **Stock-Out Risk**: products by BCG class. Choose a class in the selector (default **All Classes**) and click a bar to list the products (**Product**, **BCG Class**, **DOH**, **Units in Stock**, **Volume YTD**, **Value YTD**). Click **Show more** for more rows.

Stock limits

Company	Overstock when days of inventory are above	Stock-out risk when days of inventory are below
Tika	60 days	30 days
Majaal	180 days	60 days

Use the page's own filters (**Company**, **Category**, **Stock Band**) to narrow the view. **DOH** means Days On Hand (days of inventory).

Product: PIM Contribution

Purpose

PIM Contribution (Product Information Management) shows how each level of the product hierarchy contributes to sales, from company through category, brand, family and size down to the individual product. It also shows the performance of partner brands.

To open it: Product › PIM Contribution.

[Screenshot pending: shots/pim_top.png]

1. **KPI cards**: **Active Categories**, **Active Ranges / Families**, **Top Category by Value** and **Top Category by Volume**.
2. **Product Hierarchy Contribution**: share of sales at each level (**Company**, **Category**, **Brand**, **Sub-Brand**, **Family**, **Size**, **Product**). Choose **By Value** or **By Volume**, and a company (**All Companies**, Majaal or Tika).
3. **By Company**: Majaal's and Tika's shares.
4. **Average Selling Price (ASP)**: ASP by company.

Brand Performance

Further down, **Brand Performance** lists the named partner brands, sorted by **Revenue YTD**, with **Volume YTD**, **ASP**, **GP%** and **SKU Count**. It follows the **Company**, **Category** and **BCG Class** filters at the top of the page.

1. Click **View products** next to a brand.
2. The brand page opens, showing the brand's revenue, volume, ASP, gross margin and active SKUs compared with last year, and a product table (**Product Name**, **Company**, **BCG Class**, **Movement**, **Revenue YTD**, **Volume YTD**, **ASP**, **GP%**, **Vol Growth**) with **Export as PDF**.
3. Click **Back** to return.

Product: Product Lifecycle

Purpose

Product Lifecycle shows where each product is in its life: growing, mature, or discontinued. It helps you plan range renewal and clear out old stock.

To open it: Product › Product Lifecycle.

[Screenshot pending: shots/lifecycle_top.png]

1. **KPI cards**: **Mature SKUs** (with their share of the filtered portfolio), **Discontinued / No Supply** (with the LYTD value at risk) and **Portfolio Freshness** (the share of products newly classified this year).
2. **Segment Value — Pareto**: value per lifecycle segment (**Stars**, **Cash Cows**, **Strategic**, **Dogs**, **Mature**, **Discontinued**) this year and last year, with a cumulative % line.
3. **Product Detail**: the product table.

Product Detail table

Column	Meaning
Product Name	Product code and name
Company	Majaal or Tika
Category	Product category
BCG Class	See BCG Matrix
Lifecycle	**Active**, **Mature** or **Discontinued**
Mo. Since First Sale	Months since the product was first sold
Mo. Since Supply	Months since the product was last supplied
Value YTD / **vs LYTD**	Sales this year, and the change against last year

To work with the table:

1. Type part of a name in **Search product name…**
2. Choose a field in **Sort by** (default **Value YTD**) and a direction (**Desc** or **Asc**).
3. Click **Show more** to load more rows.
4. Click **Export as PDF** to download the list.

Use the page's own filters (**Company**, **Category**, **Lifecycle Segment**) to narrow the view.

> **TIP**
>
> To find old stock to clear, choose **Lifecycle Segment: Discontinued** and sort by **Value YTD**.

Reports and exporting

Every report is generated on screen, live, from the filters you choose. To keep or share a report, export it.

Export types

Button	Where you find it	File you get
Export PDF / **Export as PDF**	Next to **Performance Details** tables and other detail tables	A PDF of the table, including every row (on several pages if needed). The first page records the **filters applied** and who exported it (**Exported by**: your email).
Export CSV	On large tables, such as the Tachometer **Full Breakdown** and the BCG Matrix **Product Detail**	A CSV file (comma-separated values) that opens in Microsoft Excel. Arabic and special characters are kept.
Export image	On chart cards	A PNG picture of the chart, ready to paste into a presentation or email.
Download as PDF	On drill-down lists (for example Pipeline Health opportunity details)	A PDF of the list.

Exporting a report, step by step

1. Open the report.
2. Set the filters you need (see The filter bar). **The export contains exactly what the report shows for those filters**, including the date range.
3. Scroll to the table or chart you want.
4. Click **Export PDF**, **Export as PDF**, **Export CSV** or **Export image**.
5. While the file is prepared, the button may show **Exporting…**. Wait until it finishes.
6. Your browser saves the file.

The file name describes the content. For example, a YTD Value breakdown by salesperson is saved as `ytdValue-breakdown-by-salesperson.csv`.

Where exported files are saved

Files are saved to your browser's **Downloads** folder, normally **This PC › Downloads** on Windows or **Downloads** on a Mac.

- **Chrome / Edge:** press **Ctrl + J** (Windows) or **⌘ + Shift + J** (Mac) to see recent downloads, then click **Show in folder**.
- If your browser is set to "Ask where to save each file", it asks you to choose a folder first.

Printing

The dashboard has no Print button of its own. To print a report:

1. Export it with **Export PDF** / **Export as PDF**.
2. Open the PDF from your **Downloads** folder.
3. Print it from your PDF viewer (**Ctrl + P** / **⌘ + P**).

> **TIP**
>
> To print a whole screen as it looks, switch to light mode first, then use your browser's **Print** (**Ctrl + P**) and choose **Landscape**. For tables, the PDF export gives a cleaner result.

> **WARNING**
>
> Exported files contain company sales data. Store them only in approved company locations and don't send them outside the company.

Troubleshooting and FAQ

Common problems

Problem	Likely cause	What to do
I can't sign in: **Invalid email or password.**	Wrong email or password, Caps Lock on, or the wrong keyboard language.	Re-type carefully. After 5 wrong attempts your account is locked, so stop and contact the administrator if you are unsure.
Your account is locked. Contact your administrator.	Too many wrong passwords, or locked by the administrator.	Contact the administrator.
I forgot my password.		Contact the administrator. A reset needs administrator confirmation (see Forgotten password).
The page only shows **Loading...**	Slow connection, or the session is being checked.	Wait a few seconds. Then reload the page (**F5**). If it continues, sign out and sign in again.
A chart says **This chart could not load.** or the page says **This page could not load.**	A temporary server or network problem.	Click **Retry**, or reload the page.
A card shows **No rows for the current filters.** or **No data for the selected filters**	The filters are too narrow.	Click **Reset filters** (**Reset** on MARCOM pages), or widen the date range.
A filter list is greyed out with **No options**	No values exist for your other selections.	Change or reset the other filters.
The figures don't include today's latest sales.	The data is refreshed on a schedule.	Check the refresh times (08:50, 11:50, 14:50, 17:50, 20:50) and reload the page after the next refresh.
My figures differ from another report or system.	Different filters or date ranges, or data not yet refreshed.	Check both reports use the same **From/To Date**, **Company** and **Customer Group** (the default is B2B + B2C).
A report I expect isn't in the menu.	Your account has no permission for it. Reports you can't open are hidden.	Ask the administrator for access.
You do not have access to this page	You opened a link to a report you have no permission for.	Ask the administrator to grant you View permission.
A MARCOM page says **No MARCOM data uploaded yet**	That month's marketing workbook hasn't been uploaded.	Contact the Marketing department.

Problem	Likely cause	What to do
The screen is dark and hard to read.	The dashboard opens in dark mode.	Click the moon icon in the header to switch to light mode.
The export button does nothing.	The browser blocked the download.	Allow downloads for dashboards.benmussaholding.com in your browser settings, then try again.
I was signed out unexpectedly.	Your password was changed or reset, or the administrator ended your session.	Sign in again.

Frequently asked questions

Is the data live? No. It is refreshed five times a day (08:50, 11:50, 14:50, 17:50 and 20:50), with a full rebuild every night at 02:00.

Do I need to sign in every day? No. There is no automatic time-out, so you stay signed in on that browser until you click **Log out** (see Session timeout). Always sign out on shared computers.

Can I use the dashboard on my phone? Yes. Open the same address in your phone's browser. The layout adapts to the smaller screen.

Is there an Arabic interface? Not yet. The screens are in English only.

What does the bell icon do? Notifications will be available in a future release. The bell doesn't do anything yet.

Why does the Tachometer target change every day? The target shown on the gauge is the **target-to-date**, the share of the period's target due by the selected date. It grows as the year or month goes on.

Can I save my filter choices? Not at present. Filters stay applied while you move between reports, and go back to their defaults when you reload the page.

Why do some reports ignore the Company or Branch filter? The MARCOM reports use marketing data with their own filters, and the product reports work on product data, where customer and salesperson filters don't apply.

Glossary

Term	Meaning
7Ps	The seven parts of the marketing mix used to organise the dashboard: Product, Price, Place, Promotion, People, Process, Physical Evidence.
Actual	The real figure achieved in the selected period.
Aging	How long an opportunity or quotation has been open (0-30, 30-60, 60-90, 90+ days).
ASP	Average Selling Price: sales value ÷ volume sold.
B2B / B2C	Business-to-business and business-to-consumer customer groups.
BCG Matrix	Product classification by volume and profit: Stars, Cash Cows, Strategic, Dogs.
Behind Target / Watch	Amber status: below target by 10% or less.
Blocked customer	A customer blocked in the company system.
Branch	The selling branch or sales team.
CAC	Customer Acquisition Cost: marketing cost to win one new customer.
Cash Cows	High-volume, lower-profit products.
Churn Rate	Share of last year's customers who haven't bought this year.
CPC	Cost Per Click in digital advertising.
Critical Number	The daily sales value needed to stay on pace with the annual target.
Critical / Off target	Red status: below target by more than 10%.
CRM	Customer Relationship Management, where opportunities and quotations are recorded.
CSV	Comma-separated values, a table file that opens in Excel.
CTR	Click-Through Rate: clicks ÷ impressions.
Customer Group	Customer segment (for example B2B, B2C).
Days of Inventory / DOH	How many days current stock will last at the current sales rate.
Distribution Channel	The route through which a sale is made.
Dogs	Low-volume, lower-profit products.
Drill-down	Clicking a chart element to see the records behind it.
Fast / Slow Movers	Products with the highest / lowest daily sales rate.
FMT	Full-Month Target: the whole current month's target.
Forced Closure	A day a branch was closed unexpectedly.
FY / FM Target	Full-Year / Full-Month Target.

Term	Meaning
FYT	Full-Year Target.
GP%	Gross Profit percentage.
Invoice Class A–D	Invoice value bands: A > 50K, B 25–50K, C 5–25K, D < 5K LYD.
K / M	Thousand / million (for example LYD 14.1M = 14.1 million Libyan dinars).
LFM	Last Full Month: the actual of the previous complete calendar month.
LFY	Last Full Year: the actual of the previous complete calendar year.
LMTD	Last-year Month-To-Date: the same month last year, up to the same day.
LYD	Libyan Dinar.
LYTD	Last Year-To-Date: 1 January to the same day, last year.
MARCOM	Marketing Communications.
Missing Value / Missing Days	How far sales are ahead of (+) or behind (–) the required pace, in LYD or in days.
MTD	Month-To-Date: from the 1st of the month to the selected date.
On Track / On target / On Pace	Green status: target reached or exceeded.
Opportunity	A potential sale recorded in the CRM.
Overstock	Stock above the company's days-of-inventory limit.
Pareto chart	Bars sorted by size, with a cumulative % line.
Performance Details	The summary table at the bottom of most reports.
PIM	Product Information Management: the product hierarchy (company, category, brand, family, size, product).
Pipeline	All open opportunities and quotations.
Quotation	A price offer sent to a customer.
Refresh	The scheduled update of dashboard data from company systems.
Retention Rate	Share of last year's customers who bought again this year.
ROI	Return On Investment: revenue ÷ spend.
Salesperson	The person credited with a sale.
SKU	Stock Keeping Unit: a single product item.
Stars	High-volume, high-profit products.
Status badge	The coloured label (green / amber / red / grey) on a card.
Stock-Out Risk	Stock below the company's minimum days-of-inventory.
Strategic	Low-volume, high-profit products.
Target-to-date	The part of the target that should have been reached by the selected date.

Term	Meaning
Variance	The difference between two figures as a %, for example actual vs target or this year vs last year. Positive means higher.
Volume	Quantity sold (units).
Win Rate	Won quotations as a share of decided quotations.
Working Days	Calendar days minus weekly rest days (Fridays) and official holidays.
YTD	Year-To-Date: from 1 January to the selected date.

Support contact

For help with the dashboard (sign-in problems, password resets, access to reports, or questions about the figures), contact:

Name	Nahla Burweiss
Role	Data Analyst
Email	nahla.burweiss@bmh.com.ly

When you report a problem, please include:

1. The **email** you sign in with.
2. The **report** name and the **filters** you used.
3. The **date and time** it happened.
4. The **exact message** on screen, or a screenshot.

> **NOTE**
>
> Accounts, permissions, password resets, holidays and branch closures are managed by the system administrator. Marketing (MARCOM) figures come from the Marketing department's monthly upload.
